

Product Manager

Product Manager with 10+ years of experience building and shipping data-driven products across SaaS and the banking/financial services industry. Strong background in systems thinking, analytics, and process optimization, with a proven ability to simplify complex problems and deliver impact through iterative releases. Adept at translating technical and non-technical requirements, partnering closely with engineering and business stakeholders to drive alignment and execution. Thrives in fast-paced, cross-functional environments with a bias for action, strong ownership, and a focus on building reliable, scalable financial products that users trust.

Career Experience

Senior Product Manager at Morgan Stanley, Montreal

May 2022 — Present

- Owned and shipped multiple financial surveillance products end-to-end, increasing misconduct detection by 30% through iterative, data-driven releases.
- Defined product vision, **roadmap**, and **priorities**, balancing business impact, technical tradeoffs, and delivery speed in a complex, regulated environment.
- Simplified complex operational **workflows** by mapping systems end to end and partnering with engineering to remove bottlenecks and improve efficiency.
- Demonstrated a strong **bias to ship**, delivering high-quality releases using Agile methodologies while consistently meeting **100% of delivery timelines**.
- Used **SQL and analytics** to identify gaps, validate assumptions, and inform prioritization and decision-making.
- Served as the **primary communication bridge** between engineering, compliance, and business teams—**translating complex technical architectures and regulatory requirements into clear, actionable product decisions** for non-technical stakeholders.
- Clearly articulated** product strategy, tradeoffs, and outcomes to **diverse audiences**, driving alignment, faster decisions, and shared ownership across teams.
- Built and evolved scalable internal tools that improved reliability, **transparency**, and speed of operational decision-making.
- Led **UAT and launch readiness**, achieving 95% user acceptance and minimizing post-release issues.
